Pork today is very lean and shouldn't be overcooked. To check doneness, use a digital cooking thermometer. The National Pork Board follows the guidance of the U.S. Department of Agriculture.

The National Pork Board recommends cooking pork chops, roasts, and tenderloin to an internal temperature between 145° F. (medium rare) and 160° F. (medium), followed by a 3 minute rest. Since large cuts increase approximately 10° F. while resting, remove them from the heat at 150° F. followed by a 10 minute rest. Doneness for some pork cuts is designated as "tender". This includes small cuts that are difficult to test with a thermometer and large cuts that cook slowly at low temperatures. Ground pork, like all ground meat, should be cooked to 160° F. Pre-cooked ham can be reheated to 140° F. or enjoyed cold.
